SOLUTION

OUR STORY

Everything starts in 2018 to be exact starting in November. We are just a fad to create a business group in the IT field. Initially only opened a division for website creation. Currently the software division (Website) is headed by Mr. Bintang.
Then in 2019 in January, everything seemed to be moving quickly, Mr. Yong Chen, who gave us capital, gave us one division and gave a mandate to Mr. Handoko to be able to handle this division, namely the hardware division.

Everything feels fast and so fast, since we opened the software and hardware division, there have been many clients who have come to entrust us to create websites and provide consultation on consulting for their companies.

Over time, we also opened a design division for logo design, company profile, business cards and other designs. This division is also headed by Mr. Bintang.

And as time goes on, more and more clients trust us. We are also constrained by financial management and other management. And Mr. Yong Chen entrusted Mr. Handoko to head the management at our new office.
And now we continue to grow and will improve our service and quality. We know that we have to develop with the times and technology.

THIS IDEA WAS FORMED BECAUSE WE ARE AWARE THAT IN THE FUTURE, ALL WILL USE TECHNOLOGY. AND WE'RE JUST GETTING STARTED

Bintang Tobing
Co Founder Infinity Solution

The main idea was to build a team which will provide software services using cutting edge technologies ensuring quality and reliability

Our long-term relationships with our clients are the solid foundation for our company

- *solutions* : we always have solutions for you

infinity solutions
We always have infinity solutions for you.
That's why we created our name
Infinity Solutions

We are
Infinity Solutions

"

IN EVERY DEVELOPMENT STEPS, WE USE CREATIVE IDEAS, AND PROVEN METHODOLOGY. WE GUARANTEE THAT WE'RE DOING USEFUL FOR YOUR TECHNOLOGY IMPROVEMENT.

ABOUT US

Infinity Solution is an emerging information technology company in Indonesia that provides software services in the form of websites, logo creation, company profile, business card design and provides opportunities for job opportunities for those who pursue IT. We also provide quality hardware products that we have compared among our presenters to clients since 2000.

We are committed to continuously improving our intelligence and expertise and thus we can achieve our success through achieving high performance and quality. We believe that our job is to listen, research, and understand the exact requirements for each individual business. Actually, it is a long-term relationship with our clients that has served as a solid foundation for our company.

- Innovation
- Service Oriented
- Project Success Rate is 100%

OUR MISSION IS
TO DEVELOP GLOBAL
TECHNOLOGY PROVIDERS
THAT CAN BE TRUSTED & DEVELOPED
SOFTWARE SYSTEMS & HARDWARE
SYSTEMS FOR OUR CUSTOMERS.

OWN SYSTEM

For all processes we do not use shortcuts such as CMS because we judge that it does not have a strong response to change. We use systems and tools that we develop ourselves. For hardware technology we have devices that have been sorted with the best quality. The budget will always be balanced with the quality that we provide.

DEVELOPMENT

The developed system fully satisfies customer requirements. We have coupled modules which enable us to adapt to the change faster. It gives a wide set of abilities for broadening the system functions in the future.

OUR SERVICES

Infinity Solutions is a competent provider of any kind of software solutions including web solutions, hardware solutions and so on. Our expertise lies in clearly perceiving the goals of our customers, choosing the most appropriate technologies and efficiently developing solutions catered to the customer needs.

HARDWARE SOLUTION

We provide hardware services because we know that our clients need hardware that is functional, modern and has guaranteed quality. We offer a lot of user-friendly, powerful, functional hardware, with a system that is always updated.
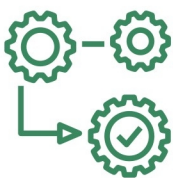

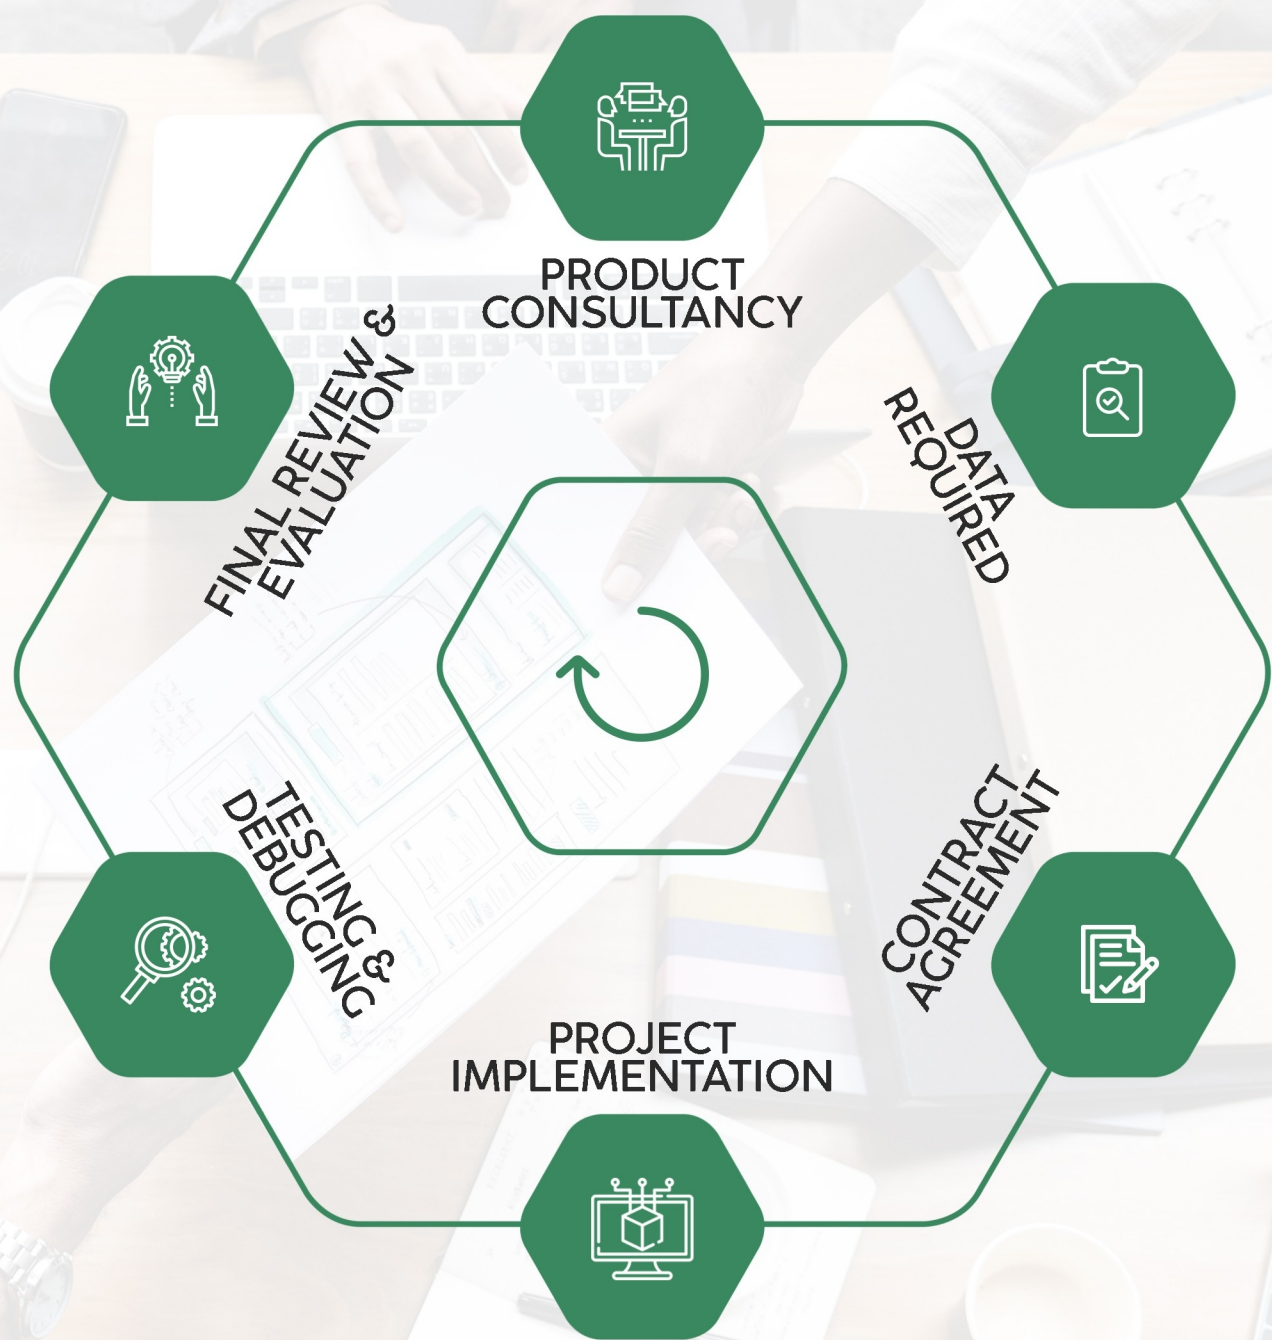

TECHNOLOGY CONSULTANCY

Infinity Solutions provides important and sophisticated enterprise solutions that meet all your requirements to achieve your key business goals. We offer consulting services that cover the entire IT life cycle, from business process reengineering to software system design, development and implementation. Our consulting services are designed to meet your business needs with the help of our individual and joint experience in the design, implementation and management of IT and communication systems throughout the world.

Consultancy areas :

- ✔ Hardware Technology

PROJECT
IMPLEMENTATION

WORK PROCESS

We know that the work process is very important to be notified to the client for work, inspection, and to achieve client goals in maintaining relationships with Infinity Solutions.

01 PRODUCT CONSULTANCY

Before the project work begins, we need to discuss how this project works. Basically this is a list of goals that need to be achieved to make the final result.

02 DATA REQUIRED

After we know what the client's goals are and how complex the story is. We will do data collection, data needed for system requirements, both from the description of the article and what will be given to visitors.

03 CONTRACT AGREEMENT

If the data collection has been completed by the client and has been verified by Infinity Solutions, usually we will ask the client to sign the contract as written in the length of time, terms and conditions, price, law, and other things that may need to be agreed by both parties.

04 PROJECT IMPLEMENTATION

After the data collection is complete and the contract is completed, we usually directly involve the development team, the management team, to clarify the details of the client story, and the next stage we immediately design how UI (*User Interface*) design, coding, and other techniques. We synchronize users with the latest developments, improve communication, identify obstacles that must be eliminated. In this way the process of carrying out work can be done on time.

05 TESTING & DEBUGGING

This is not a separate phase at the end of the coding as it is usually done. When the story is ready for review, the project that has been done, is tested according to the criteria for receiving the story. Bugs are fixed and retested if needed. We do testing Integration and regression when all the stories in the previous process are complete. This ensures that deliverables or increments are in working condition and ready.

06 FINAL REVIEW & EVALUATION

In this session, work is indicated. We also prepare for any changes that need to be made in accordance with the agreement. We always accept constructive suggestions to see what is going well, what is wrong and what can be improved in the process. This allows us to continue to grow and develop.

" Our clients see technology as a source of growth, as a way to make their next flagship product.
